

TULECKA (A)

WINTER WHEAT

▶ QUALITY WHEAT TOLERANT TO DROUGHTS

▶ INFORMATION

- ▶ qualitative variety – group A,
- ▶ characterized by high and stable yield (up to 104% of the standard),
- ▶ medium early ripening with high resistance to changing soil and climate conditions,
- ▶ yield stability in changing weather conditions.

UTILITY AND AGRICULTURAL FEATURES

Heading date	Average
Ripening period	Average
Grain uniformity	High
Resistance to lodging	High
Yield potential	Very high
Winter Hardiness	Average
Protein content	Average
Gluten content	Average
Falling number	Average
Sedimentation number	Average
1000 grains weight	High

RESISTANCE TO DISEASES ACCORDING TO COBORU (9° SCALE)

Powdery mildew	7.5 – High
Brown rust	7.3 – Very high
Leaf septoria	6.7 – High
Husk septoria	7.3 – High
Head blight	8.2 – Very high
Culm base diseases	7.8 – Very high
Brown leaf spot	7.5 – Very high
Yellow rust	7.4 – High
