

WINTER WHEAT

LEGENDA (A)

- Very tall plants (the tallest variety) yielding a lot of straw and grain – a variety very suitable for livestock farms.
- Excellent winter hardiness (6), the highest in COBORU tests, ensuring crop safety.
- Highest resistance to ear fusariosis.

- Insensitive to delayed sowing date – successfully sown even in November.
- Ideal for cultivation after beets and corn.
- High tolerance to soil acidification and low site requirements.
- Mid-to-late earing and maturity dates.
- High and stable yield potential, up to 108% of the reference.
- Medium resistance to lodging.
- High resistance to all wheat diseases, especially high to brown leaf spot and septoria nodorum blotch.
- Well-uniform, robust grain, with a high TGW, very high falling number and high hectoliter weight.

UTILITY AND AGRICULTURAL FEATURES

Type of variety	A
Earing date	medium-late
Full maturity date	medium-late
Plant height	118 cm
Winter hardiness	6
Resistance to lodging	6.3 medium
Soil requirements	low
Tolerance to soil acidity	high
TGW	45.4 g
Seed density (pcs per sq.m)	350–450 pcs

DISEASE RESISTANCE (9° scale)

Snow mold	no data
Powdery mildew	7.8 very high
Stem base diseases	7.4 high
Brown rust	7.6 high
Stripe rust	7 medium
DTR	8 very high
Leaf septoria	6.7 high
Chaff septoria	7.9 very high
Ear fusariosis	9 very high
