

WINTER RYE

POZNAŃSKIE

- High health profile – high or very high full spectrum disease resistance.
- Performs excellent even on weaker sites.

- Very stable and high yield level.
- Tall plants with high lodging resistance and mid maturity date.
- Low soil requirements and good tolerance to soil acidification.
- Excellent tolerance of intermittent water shortages – strongly developed root system.
- An open-pollinated variety intended for grain and green fodder.
- Lowest TGW among all winter rye varieties.

UTILITY AND AGRICULTURAL FEATURES

Earing date	medium
Full maturity date	medium
Seed protein	6
Plant height	160 cm
Resistance to lodging	5.6 high
Soil requirements	low
Tolerance to soil acidity	good
TGW	30.3 g
Seed density (pcs per sq.m)	280–320 pcs

DISEASE RESISTANCE (9° scale)

Snow mold	7.8 very high
Powdery mildew	7.9 very high
Stem base diseases	7.4 high
Brown rust	6.6 high
Stem rust	8 very high
Scald disease	7.3 medium
Leaf septoria	6.9 good
