

WINTER BARLEY

# KOBUZ

- Very good plant health and high disease resistance, especially to snow mold and powdery mildew.
- Excellent winter hardiness (5.5).

- A variety with low soil requirements with good tolerance to soil acidity.
- Medium height plants (99 cm), resistant to lodging.
- Very good fodder variety with high nutritional value, thanks to its high protein content in grain.
- Low TGW – lower seeding cost.
- Variety recommended for intensive cultivation.
