

# PEA TYTAN

- Very large and fertile seeds that provide the plant with a great start due to the large amount of ingredients in them.
- Lowest fiber content, great digestibility.

- White flowers, yellow seeds.
- High and stable yield level (102% of the reference in 2020-2021).
- Excellent nutritional performance – low fiber content ensures better digestibility, while high protein content ensures better palatability and weight gain.
- Very good health and disease resistance, especially to ascochyta blight and powdery mildew.
- Very extensive root system with a large number of root hairs – better uptake of mineral nutrients.
- Good adaptability to different soil conditions.

#### UTILITY AND AGRICULTURAL FEATURES

Type of variety	multiuse
Plant height	84 cm
Seed protein	23% DM
Fiber content	5.7% DM
Resistance to lodging after flowering	6.8 medium
Soil requirements	medium
TSW	256 g
Seed density (pcs per sq.m)	110–120 pcs

#### DISEASE RESISTANCE (9° scale)

Pea fusarium wilt	7.4 medium
Ascochyta blight	7.8 high
Powdery mildew	7.9 high
Downy mildew	6.9 medium
