

PEA CYSTERSKI

- **Very low and early variety.**
- **Lowest TSW among all edible varieties.**

- Variety with the lowest plants, early flowering and ripening date.
- White flowers and white seeds.
- Very good health across the full spectrum.
- An evenly ripening variety, recommended for nationwide cultivation in Poland. Very popular also abroad.
- Low TSW combined with certified seeds with high germination power means a lower seeding standard.
- Plants have very good rigidity and resistance to lodging.
- Fine seeds are excellent for feeding to pigeons.

UTILITY AND AGRICULTURAL FEATURES

Type of variety	multiuse
Plant height	78 cm
Seed protein	21.4% DM
Fiber content	5.9% DM
Resistance to lodging after flowering	7.3 high
Soil requirements	medium
TSW	215 g
Seed density (pcs per sq.m)	110–120 pcs

DISEASE RESISTANCE (9° scale)

Pea fusarium wilt	7.7 high
Ascochyta blight	7.4 medium
Powdery mildew	7.8 medium
Downy mildew	7.6 very high
