

BLUE LUPINE

~ TANGO ~

- Highest seed protein content.
- Very high drought tolerance and yield consistency – the least yield loss under drought conditions.
- High level of disease resistance.

- A traditional-type variety, with white flowers and white seeds.
- High and stable seed yield.
- A variety with high resistance to fusarium, anthracnose and gray leaf spot.
- Due to its high protein content, it is ideal for animal feeding, especially in fodder mixtures and concentrates together with yellow lupine and peas.
- Medium height plants, very resistant to lodging, with late flowering and maturity.
- The variety is not very sensitive to delayed sowing date.
- Recommended for nationwide cultivation in Poland (List of Recommended Varieties in 8 provinces).

UTILITY AND AGRICULTURAL FEATURES

Type of variety	sweet
Flowers color	white
Plant height	61 cm
Resistance to lodging after flowering	8 very high
Seed protein	31.2% DM
Alkaloid content	no data
Crude fat content	no data
Crude fiber content	no data
Uniformity of ripening	7.8
Soil requirements	low
TSW	135 g
Seed density (pcs per sq.m)	90–100 pcs

DISEASE RESISTANCE (9° scale)

Fusarium wilt of lupines	7.3 very high
Anthracoze – pod formation stage	8.5 very high
Anthracoze – pod ripening stage	8 very high
